

connect to tech

Available Services For Students

- ✓ In-Class Presentations on Technology Careers
- ✓ Technology Demonstrations
- ✓ Technology Mentoring
- ✓ Workplace Tours
- ✓ Job Shadowing
- ✓ Internships

Sample In-School Services

- A Chief Technology Officer describes his software company, the products they invent and what educational background is needed to succeed in the field
- An Engineering Vice President mentors students through their technology innovation projects for a competition
- A student interested in graphic design shadows a marketing representative, a web site designer, and a project manager to truly understand career alternatives
- Students spend time during summer vacation at local companies contributing to real-world projects while they learn technology and communication skills
- A website designer describes her role and job responsibilities and demonstrates some interactive sites

“Our mission is to inspire and support students to connect to technology education and career opportunities through corporate, community and academic partnerships”

How we connect in school with you:

- Volunteer technology professionals discuss experiences about education and jobs in the science, technology, engineering and math fields
- Discussion forums with students focus on timely topics such as green energy, IT , social media, communications skills and more
- Hands-on demonstrations of science experiments, computer hardware and software, telecommunications discoveries and more
- College and University students share their insights on the choice of a specific path within a technology curriculum
- Local companies open their doors to “real-world” data centers, engineering test labs, design and simulation areas, software development and operations support centers and more
- Targeted internships in technology fields are available locally
